Overall planning work in process of development and eventually refinement. Need to tackle issues like accessibility, car parking, economy of space, strategy of planning (conform plan form, etc.); building system, security & surveillance etc.

Problem in trying to match / find compatibility between 'Building Type' and 'issue / case study'. 'Site-bound initial explanation' might be a good idea.

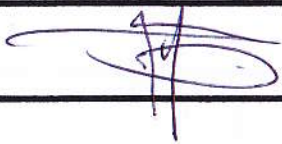

~~Does~~ Not able to reason the <sup>choice</sup> of issues; Need to ~~to~~ explore issues in context; Edutainment v learning? (which one?)

Church to be located in M'isa or hypothetical brief.

Needs to use drawings as key tool to design and develop design and no longer as just a presentation ~~tool~~; drawings need to be made - then expanded, amended as necessary etc. → then extended etc (3D) = This is how drawings can be used to explore ideas and develop them. Use the same drawing template.
